

# ALOK SHAW

Software Engineer / Front End Developer / Web Developer  
+91 9330265012 | rithikeshh@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Software Engineer (SDE) with 3+ years of experience building scalable applications for HRMS. Delivered 30+ high-impact features across frontend and backend, with expertise in React, Angular, Node.js, PHP, REST APIs, and workflow automation. Strong focus on performance optimization, reusable architecture, and scalable system design, improving application efficiency by up to 25%

## TECHNICAL SKILLS

|                  |                                                                                                                                                     |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Core Languages   | JavaScript (ES6+), TypeScript, PHP, Java                                                                                                            |
| Frontend         | Next.js, Angular, React, jQuery, Rxjs, Stencil, HTML5, CSS3                                                                                         |
| Backend          | Node.js, Express.js, MongoDB, RESTful APIs, PHP, Java, Redis, NoSql                                                                                 |
| Cloud & DevOps   | AWS, Azure, Docker, CI/CD, Jenkins, Github                                                                                                          |
| Styling          | Tailwind CSS, Bootstrap, Material UI, SCSS, CSS Grid, Flexbox                                                                                       |
| State Management | Redux Toolkit, Zustand, React Query, Context API, Ngxs                                                                                              |
| Build Tools      | Vite, Webpack, Babel, ESLint, Prettier                                                                                                              |
| Tools & Practice | Git, Jira, Kubernetes, Version Control, npm, Cursor, Figma, AI Tools, Agile Development, Playwright, Postman, Prompt Engineering, Vibe coding, WCAG |

## PROFESSIONAL EXPERIENCE

### Darwinbox | Software Development Engineer I Mar 2024 – Present

- Built and Delivered 30+ high impact features across HR modules (Talent Acquisition, Payroll, Onboarding, Talent Intelligence, HR Docs) used by 1000+ organizations.
- Built an AI-powered candidate screening workflow that automatically evaluates applicants after resume scoring, triggers automation rules, and applies recruiter actions (shortlist, reject, human review) with safe retry handling and multi-service integration (PHP + Node.js)
- Engineered a reusable wrapper web component using Stencil for the Tiptap editor, enabling dynamic data pill referencing and reducing manual JSON path dependency by ~60%, improving scalability of the configuration workflow.
- Delivered recruiter chat and email-thread messaging in a talent acquisition communication hub, with delivery status, retry/delete, consent-aware replies, and improved thread loading UX.
- Developed a drag-and-drop JSON tree interface in React that simplified complex syntax-based workflows and significantly improved user experience for non-technical users.
- Optimized Offer Letter page performance by refactoring API integration logic and lazy loading, improving efficiency by ~60% and enhancing responsiveness.
- Implemented lazy loading in Angular using Intersection Observer to load data based on scroll behavior, reducing initial page load time and improving rendering performance across all devices including smartphones.

## KEY PROJECTS

### Struct UI - Custom UI Component Library | <https://ui-struct.vercel.app/>

- Built a reusable UI component library, improving development efficiency and ensuring consistent design across applications.

### Blogs Backend API – Blog Endpoints | <https://github.com/Rithikeshh/blog-s-backend>

- Developed RESTful server-side APIs using Node.js, Express.js, and MongoDB supporting authentication, scalability, and full CRUD operations.
- Features: Blog posting, likes, comments, sign up, login, and authentication.

## EDUCATION

University of Calcutta | Bachelor of Science | 2023 | CGPA: 7.52 / 10

## AWARDS / CERTIFICATES

**Exemplary Contributor Award (FY 2024-2025):** For outstanding Performance

**Full Stack Web Development (FY 2023-2024):** Completed the certification of full stack developer ([link](#))
